Texans Can Do More with Wireless: Faster Sprint Mobile Broadband in Numerous Cities

Extended Network Coverage, Faster Data Speeds and New Devices Let Texans Customers Check Email, Download Large Files and Music and Send Video

AUSTIN, Texas - Whether in the Rio Grande Valley, San Antonio or Dallas/Fort Worth, Sprint customers in Texas can do more with wireless thanks to a faster mobile broadband network. With Sprint's newest (EV-DO Revision A) technology, along with a wide variety of devices, customers can check and send e-mail with large file attachments, download music and access robust location-based solutions.

Sprint took a big step forward this month by upgrading its network in more than two dozen markets across the country, including cities throughout Texas including Austin, Corpus Christi, Houston, Temple/Killeen, Victoria, Waco and surrounding cities and suburbs. Sprint now reaches more than 193 million people in more than 9,600 cities and covers 880 airports with its faster mobile broadband technology (EV-DO Rev. A) and is on track to upgrade the vast majority of its mobile broadband network to the faster technology by year-end.

"Customers in many cities throughout Texas can experience the nation's largest mobile broadband network in more places with faster speeds than ever before, and we aren't finished improving the customer experience," said Mike Karageorge, area vice president for Sprint. "This year, Sprint is continuing investments to enhance its powerful networks and expand mobile broadband coverage across the nation. That's on top of the more than \$234 million that Sprint spent in Texas in 2006. Sprint is committed to letting our customers do more with wireless."

On average, customers can experience significantly faster upload speeds of 350-500 Kbps (compared with 50-70 Kbps on current EV-DO networks) and download speeds of 600 Kbps-1.4 Mbps (from 400-700 Kbps.) on the Sprint Mobile Broadband Network. To compare these Rev. A speeds against the speed of their current connection,

Internet users can visit www.sprint.com/speedtest.

In December 2006, Sprint's upgraded mobile broadband network was awarded the coveted PC Magazine Editor's Choice Award selected by a panel of PC Magazine editors, and leading industry experts.

The upgraded Sprint Mobile Broadband Network is now available in the following Texas cities:

Dallas/Fort Worth - Coverage in the metropolitan area of Dallas-Fort Worth including Allen, Burleson, Carrollton, Cedar Hill, Cleburne, Coppell, Corsicana, Decatur, Denton, DeSoto, Durant, Flower Mound, Frisco, Gainesville, Garland, Grapevine, Greenville, Keller, Lancaster, Lewisville, Mansfield, McKinney, Mount Pleasant, Plano, Richardson, Rockwall, Rowlett, Sherman, South Lake, Stephenville, Terrell, Waxahachie and Weatherford.

Houston - Coverage in the metropolitan area of Houston including downtown, Galleria area, Medical Center, The Woodlands, Sugarland, Bellaire, Galveston, Texas City, Pearland, Pasadena, League City, Missouri City, Friendswood, Alvin, Rosenberg, Katy, Baytown, La Porte, Bryan, College Station, Kingwood, Conroe, Tomball, Humble, Jersey Village, Bunker Hill, Huntsville and Prairie View.

San Antonio - Coverage in the city of San Antonio including New Braunfels, Seguin, Canyon Lake, Boerne, Fredericksburg, Kerrville, Bandera, Uvalde, Hondo, Devine, Pearsall, Dilley, Poteet, Pleasanton, Floresville, Karnes City, Gonzalez, Lavernia and Stockdale. Military installations include Randolph and Lackland Air Force Bases, Fort Sam Houston, Camp Bullis, Camp Stanley and Brooks Army Medical Center.
